PROJECT

FeedLink – Full Stack Food Redistribution Platform

[GitHub](#) | [Live Demo](#)

Tech Stack: Next.js, React.js, PostgreSQL, Prisma, JWT, REST API

- Built a full-stack food redistribution platform using **Next.js**, **React.js**, and **PostgreSQL** to reduce food wastage through efficient donor–NGO coordination.
- Designed and implemented **role-based dashboards**, real-time food tracking, QR verification, and volunteer management workflows for seamless food distribution.
- Optimized logistics using location-based matching algorithms and scalable database architecture with **Prisma ORM**.

Delhi TrafficAI – Smart Traffic Prediction System

[GitHub](#) | [Live Demo](#)

Tech Stack: React.js, FastAPI, TensorFlow, Python, Scikit-Learn, Recharts, Uvicorn

- Developed an AI-powered traffic prediction system using **TensorFlow**, **FastAPI**, and **React.js** to forecast congestion levels and travel time across multiple Delhi zones.
- Built and integrated machine learning models for real-time traffic forecasting using historical traffic, weather, and road condition datasets.
- Designed an interactive analytics dashboard with congestion visualization and route insights to support smarter travel planning.
